OUR CONCEPT

Basic examination:

Examination of the teeth, gum and oral mucosa in the mouth

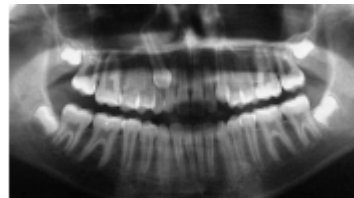

Clinical Examination

Periodontal Screening

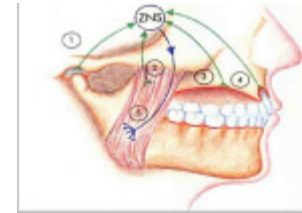

Panoramic X-ray

Analyzing the results of the X-ray with the Dentist

Private Dental Check

The CMD check includes the examination of the TMJ as well as the chewing muscles. Furthermore, we check the correlation between the occlusion and TMJ muscles.

PA Check

We evaluate the risk of periodontitis, which could lead to various diseases such as diabetes, arthritis and apoplexy.

Esthetic Check

We evaluate the position, color and form of your teeth.
